Does not Display Previously Selected Item in Next Row in Interactive Grid

By-Muhammad Nur E Alam

Step: 01 –

First download the Plug-in

https://apex.world/ords/f?p=100:710:14164789710673::::P710_PLG_ID:CA.INSUM.GETIGDATA

Or Take Plug-in from My Drive:

Z:\My Drive\My_Oracle\Apex\Apex_All_Command_Coding\Does not Display Previously Selected Item in Next Row In IG\dynamic_action_plugin_ca_insum_getigdata.sql

Step: 02 –

Install the Plug in your application –

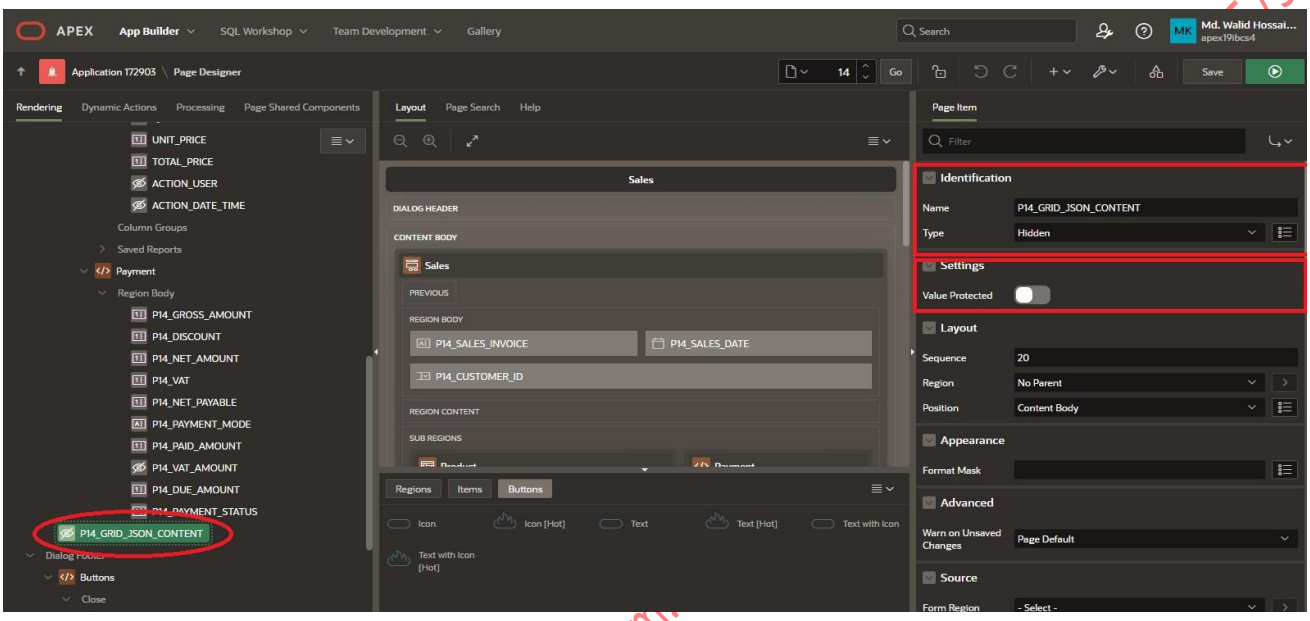

- Go to Shared Component
  - In **Others Component** → Plug-ins → Select **Import** → Select **Plug-ins** → Drag and drop the dynamic_action_plugin_ca_insum_getigdata file and Click Next.

Step: 03 –

Go to the page Body:

- Create a Page Item: **P91_GRID_JSON_CONTENT** (or Any name u want give)
- Give this page type in **Hidden.**
- In **Settings – Switch off the – Value Protected Option**

Teacher: Muhammad Nur E Alam, nurealam.

Step: 04 –

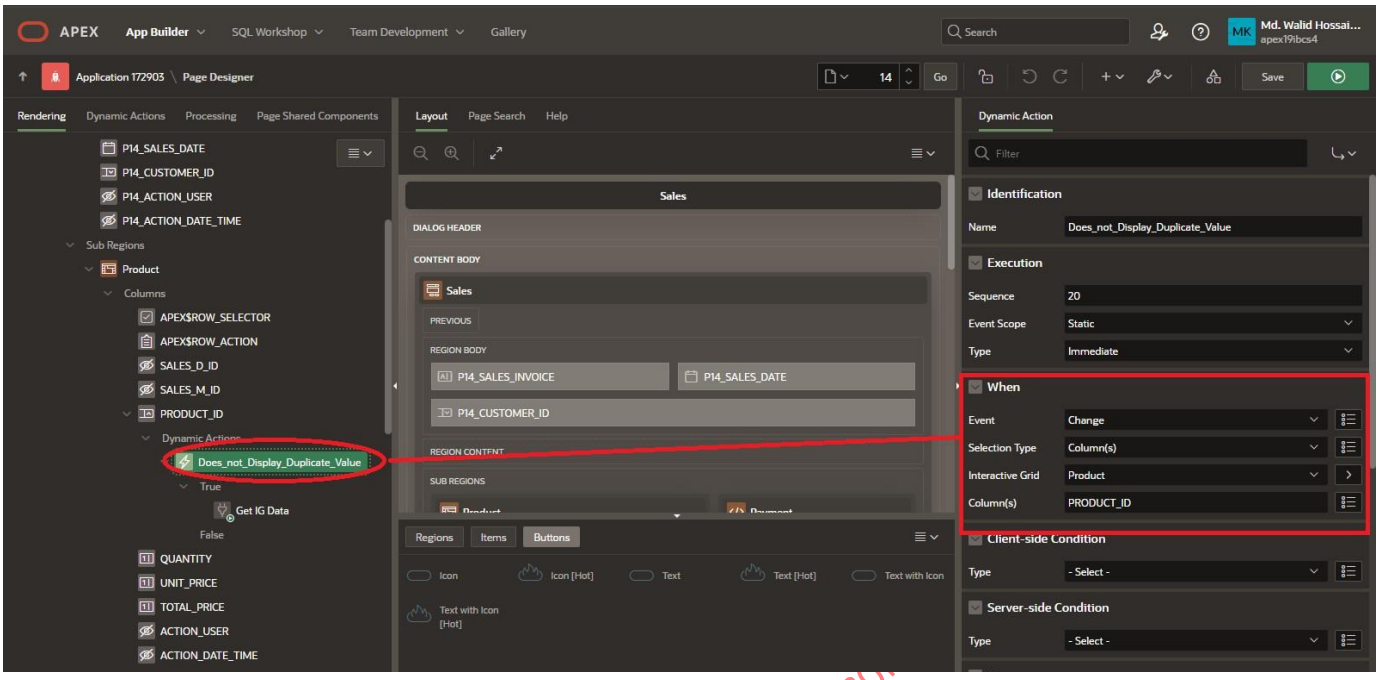

In Detail Region the ITEM_ID Type **must be** selected in **POP_LOV**.

Step: 04 –

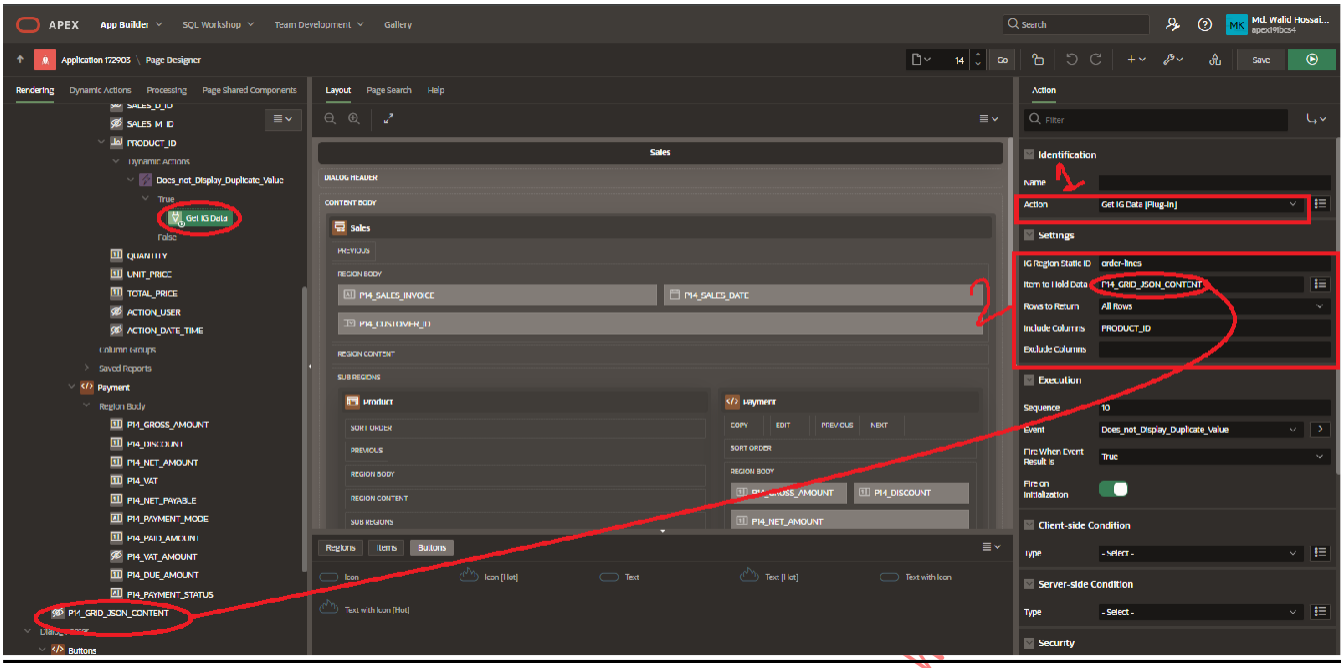

Create a **Dynamic Action** in **ITEM_ID** **in** **Interactive Grid Region** (Where you want apply in your Page Item.)

- **Dynamic Action –** Named DA_Does_not_Display_Duplicate_Value
- **In When Section -**
  - Event: Change
  - Selection Type: Column(s)
  - Interactive Grid: ITEM
  - Column(s): ITEM_ID (Selected your Column in your App)
- **In True Section –**
  - In **Identification:**
    - **Action:** select **Get IG Data [Plug-In]**
  - In **Settings:**
    - **IG Region Static ID: nur**
    - **Item to Hold Data: P91_GRID_JSON_CONTENT (**Select the **Hidden Page Item** that you have created before**)**
    - **Rows to Return: All Rows**
    - **Include Columns: ITEM_ID (select your Column)**

Teacher: Muhammad Nur E Alam, nurealam.rajjak@gmail.com WhatsApp: +8801917975575

Teacher: Muhammad Nur E Alam, nurealam.rajjak@gmail.co

Step: 05 –

In **ITEM_ID**

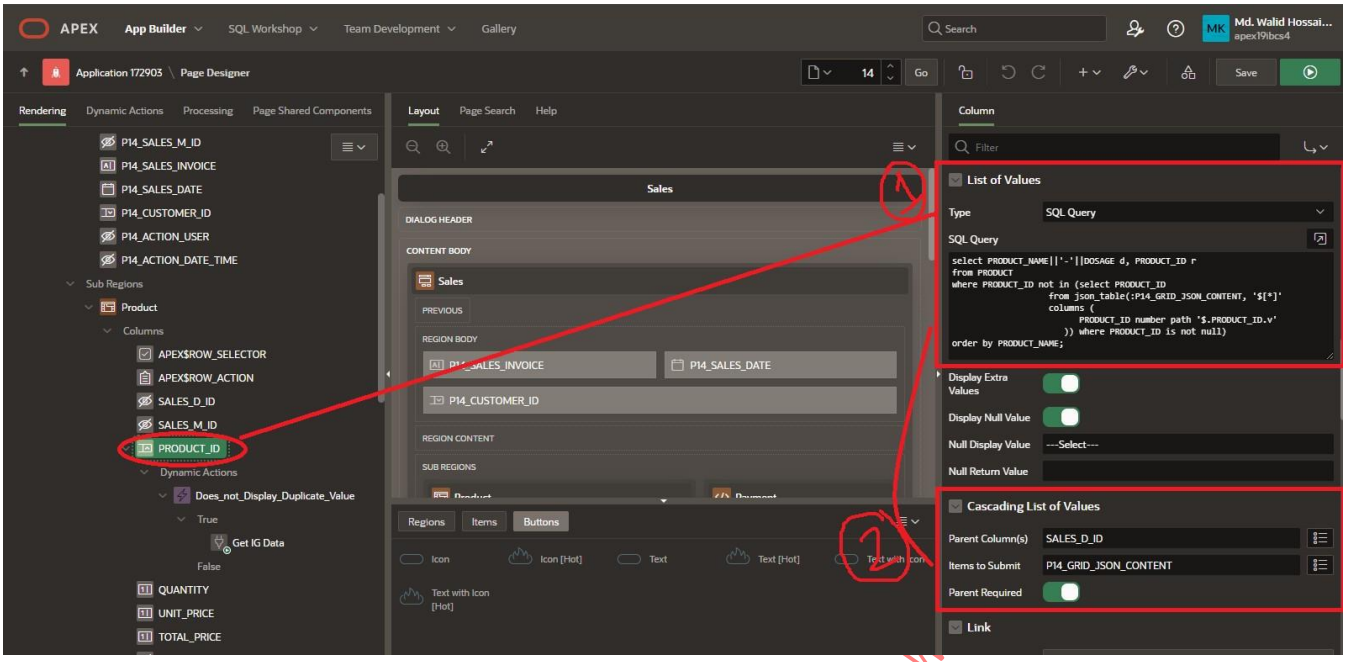

- In **List of Values –**
  - **Type: SQL Query**
    - **SQL Query:**

```
select ITEM_NAME d, ITEM_ID r from ITEM
where ITEM_ID not in (select ITEM_ID
        from json_table(:P91_GRID_JSON_CONTENT, '$[*]'
            columns (
                ITEM_ID number path '$.ITEM_ID.v'
            )) where ITEM_ID is not null)
order by ITEM_NAME ;
```

[In your App you Place your Column & Table Names (like – PROUCT_NAME, PROUCT_ID, Table – ITEM)]

- In **Cascading List of Values –**
  - **Parent Column(s): SALES_D_ID** (select your Details PRIMARY KEY)
  - **Items to Submit: P91_GRID_JSON_CONTENT** (select your earlier created Hidden page for JSON Plug-In)

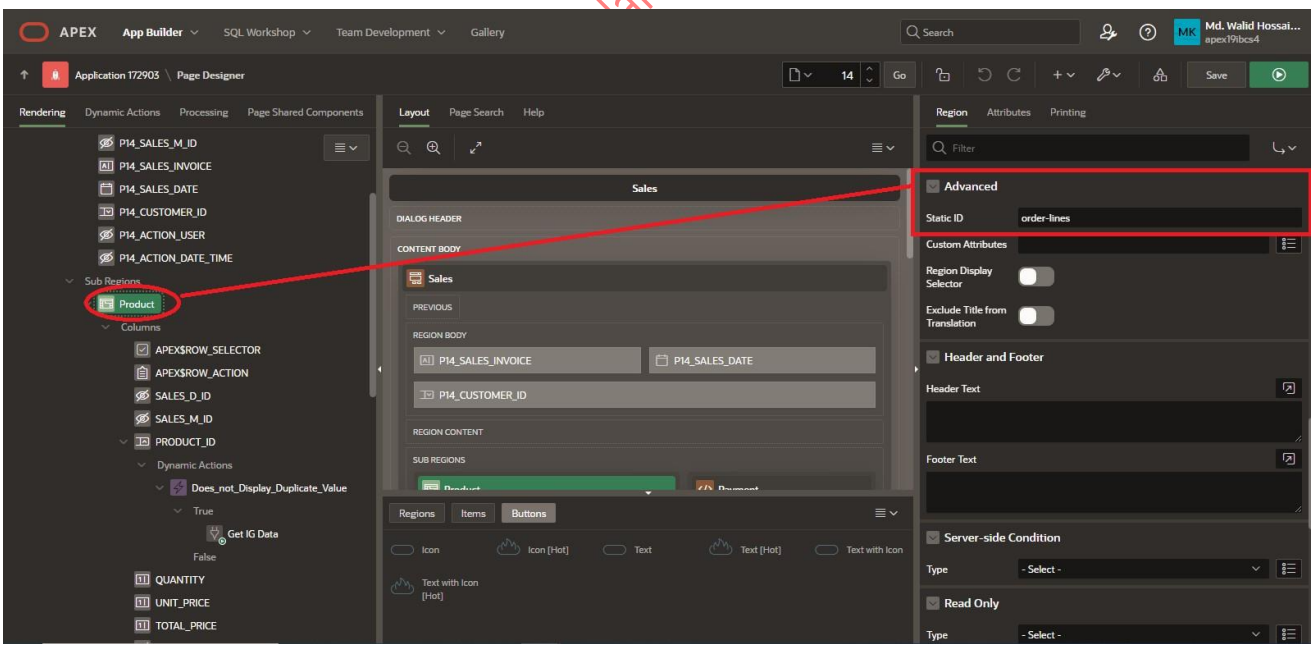

Teacher: Muhammad Nur E Alam, nurealam.rajjak@gmail.com

Step: 05 –

In **Detail Region** Which is **Interactive Grid**

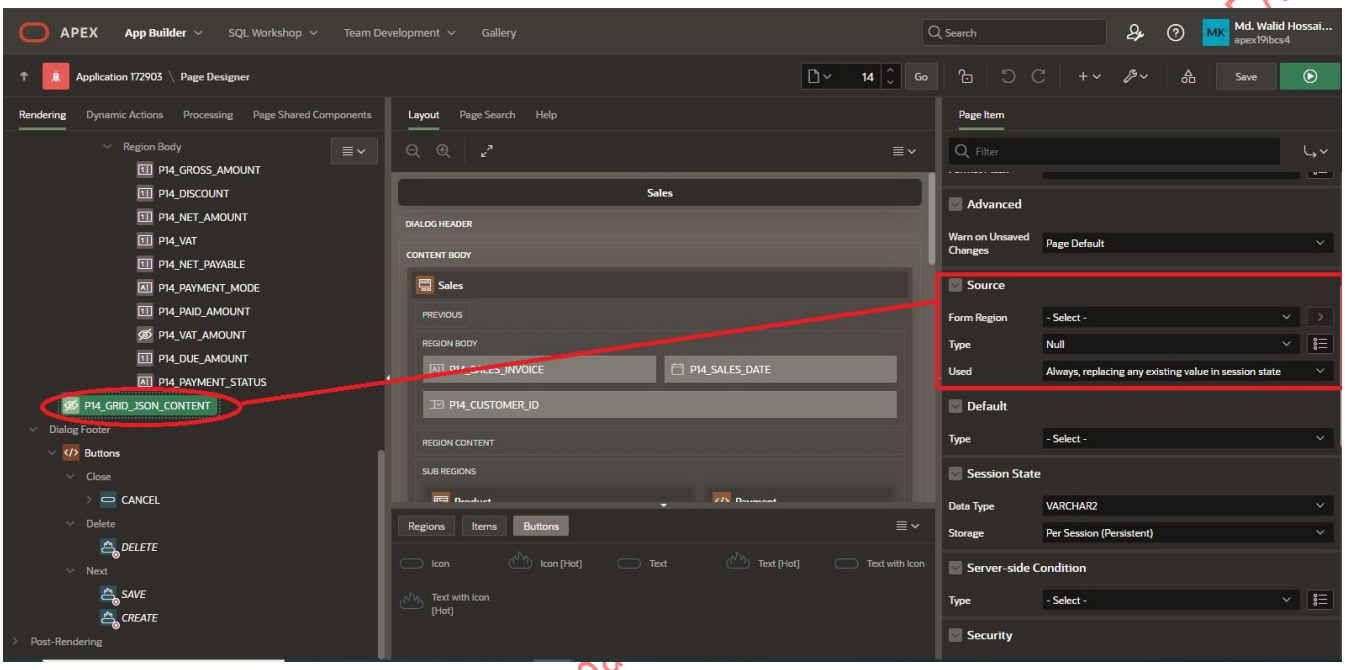

- In **Advanced –**
  - **Static ID: nur**

Step: 06 –

In the **Hidden Page Item P91_GRID_JSON_CONTENT**

- In **Source** Section –
  - **Type: Null**
  - **Used: Always, replacing any existing value in session state**

@@@@@@@@@@ **End** @@@@@@@@@@
